DESIGN OPTIONS

Spitfire S-400 Series Timber doors are backed by a reassuring 10-year guarantee and designed for minimal maintenance to preserve their exquisite appearance and optimal functionality.

Handcrafted from a selection of premium wood species, Spruce or Oak - our timber doors offer versatility and sophistication. Enhance the natural beauty of your door by opting for a stunning stain or oil treatment to accentuate its' unique grain. Alternatively, explore our extensive range of RAL paint finishes for a personalized touch.

Personalization is key with our timber doors. Choose a single colour on the exterior and a contrasting shade on the interior, allowing for seamless integration with your home's aesthetic. Elevate your design further with our diverse collection of contemporary and traditional door handles, meticulously designed to complement your style.

Why not visit our door designer to see the full range of handles available and let Spitfire redefine the entrance to your home with our exquisite timber door collection.

“

Wood is universally beautiful to a man. It is the most humanly intimate of all materials.”

- Frank Lloyd Wright

VINTAGE DESIGNS

Introducing our Vintage range of front doors, where every design is meticulously curated using reclaimed timber to craft a truly bespoke, one-of-a-kind masterpiece.

Just like our Modern and Classic ranges, Vintage doors are meticulously handcrafted using engineered timber and thermally efficient cores to ensure durability and performance. What sets the Vintage doors apart is the careful selection of reclaimed wood, chosen for their character and history.

Each Vintage door features a unique 19mm bonded panel, created by expertly securing the reclaimed timber to the exterior face of the door. It is this attention to detail that makes every Vintage door a captivating focal point for any home.

Please note, as the reclaimed timber is untreated, Vintage designs are best suited for homes with protective canopies above the door to shield them from the elements.

“

Together we can preserve the forest, securing this immense treasure for the future of all these our children.”

- Chico Mendes

Forests regulate our climate, clean the air we breathe, and filter the water we drink. They also provide habitat for more than two-thirds of terrestrial wildlife and plants. They are one of our most important resources, offering a renewable supply of the materials and goods we need for a more sustainable future.

Spitfire Doors S-400 Timber Doors are PEFC certified, which means that the forest resources are maintained or enhanced, ensuring that they can act as a sink, capturing and storing carbon dioxide. PEFC certification also provides assurances that wood and non-wood products have been sourced from sustainably managed sources

PASSIVE HOUSE TIMBER DOORS

A passive house, or Passivhaus (the German term), is a type of building design that focuses on maximizing energy efficiency and minimizing energy consumption for heating and cooling. The concept originated in the 1970s in response to the energy crisis and has since evolved into a rigorous standard for sustainable building design.

Properties which meet the criteria can meet up to a 90% reduction in heating and cooling energy compared to conventional buildings, making passive houses among the most energy-efficient structures available today.

Our high-performance S-400 Series Doors achieve Passive House standards when crafted using our 100mm flush profile, achieving a U-Value of 0.7 W/m²K.

Modern Series 68mm profile
U-Value 1.1 W/m²K

Flush 100mm profile
U-Value 0.7 W/m²K

Achieves Passive House
Standards

S-400 SERIES TECHNICAL SPECIFICATION

Dimensions ■ Single doors up to 2700mm high ■ With sidelights and toplight can reach 2900mm wide x 2900mm high	Species of Wood ■ Spruce or Oak ■ Reclaimed Vintage timber – we recommend that reclaimed timber doors are installed under the protection of a porch or canopy
