

For more information on the IBMA finish please see our finishes and patinas collection brochure

Combinations of ironmongery products are available upon request.
Due to the printing process involved the actual products shown in this brochure may differ slightly in shape and colour from the pictures shown.

Stylish and beautifully finished, hand crafted window and door fittings completely made in the United Kingdom.

OPTIONS GUIDE

Thank you for taking time to choose our products to go with either your new windows or doors, or if you are planning to refurbish your current windows and doors.

Over time windows and doors have evolved to offer improved thermal efficiency and enhanced security with modern window fittings. Somehow the quintessential British window handle had been lost with the drive to improve windows and doors.

Traditional Window Fittings Ltd offer you a range of authentic fittings to suit most modern windows and doors via a network of specialist installation partners.

Our products are made using two methods of casting, either malleable iron greensand cast or solid brass cast. All our products are made in Britain using traditional casting methods, all products are polished and assembled by hand before the final finishing paint or plating is applied.

The following options offer an extensive range of shapes, styles and colours, but should you have a particular product or colour in mind please do not hesitate to contact us as we produce many special one-off products or colours. Subject to written agreement by all parties involved.
